Superior Load Protectors provide a cushioned non-slip surface between product and steel fork, eliminating expensive scratching, chipping, marring and scuffing caused by steel forks. Molded from premium polyurethane to OEM specifications, Superior Load Protectors fit right over standard lift truck forks with mounting hardware.

- Made to OEM specifications from 91A hardness premium polyurethane.
- Eliminates damage in several typical applications such as exotic castings, building materials, tombstone handling, windows, etc.
- Moldings for over 15 different sizes, with popular sizes in stock.
- Melting point is 275 degrees
- Low temperature is -20 degrees
- Bottom cover is about 10" long making cover like a pocket.
- Slides on and pin slips through bracket at rear of protector behind heel of fork.
